Delivered prices are published as a guide only to provide approximate delivered costs at each destination. Freight costs are based on prevailing rates for the most commonly used carriers, routings and types of loadings for each product and destination. No allowances are made for contract rates, special discounts, and other routings for which there can be substantial variances from the prices shown. All prices are in U.S. funds.

**PRICES ARE PUBLISHED AS A GUIDE ONLY** to sales at the manufacturer level in carload or similar volumes during the week of publication. No attempt is made to predict future prices or trends. Specific sales, because of variations in stock quality and tallies, result in prices that are higher or lower than those published. The report is based on sizes and grades that conform to Product Standard 20-15 and on surfacing, grademarking and discounts that conform to general industry practices; on stock that originates in the principal producing region for each species; and on random-length loadings that contain a normal assortment of the lengths most desired in each size.

Item codes used to identify Lumber prices for spreadsheet and database files, and in My Print at [www.rlmyprint.com](http://www.rlmyprint.com)

# PRICE GUIDE

# International Item Codes

Item codes used to identify International prices for spreadsheet and database files, and in My Print at [www.rlmyprint.com](http://www.rlmyprint.com)

**[mbf/msf/m<sup>3</sup>]** Prices are in U.S. (\$) or Canadian (\$) currencies. Prices are gathered in board feet/square feet and converted to cubic meters. For conversion factors, see [www.ripi.com](http://www.ripi.com). Go to In Depth > Useful Data > Conversion Factors, or call Random Lengths at 1-888-686-9925. **Prices are published as a guide only.** No attempt is made to predict future prices or trends. Specific sales may be higher or lower because of variations in stock quality, tallies, and other factors.
