

Pp peggies / per car charge

spaced, pre-drilled holes are arranged in vertical and horizontal rows. Hooks or pegs can be inserted into the holes to support displays, tools, etc.

peggies British term for small random shingles usually sold by weight.

peg-tooth saw A British term for a cross-cut handsaw with teeth shaped like narrow triangles.

pellet A small piece of fuel, used in a pellet stove and other heating appliances, consisting of heavily compacted sawdust.

pellet mill A facility that manufactures wood pellets for use as fuel. The pellets are made from heavily compacted sawdust, often a byproduct of sawmilling.

Pencil Cedar See EASTERN RED CEDAR.

pencil end trimmed Lumber that is not double end trimmed or precision end trimmed to length, but rather has been marked by a pencil or crayon to the desired length and tallied accordingly. Usually shop lumber.

pencil ripped Lumber that has been pencil-marked to show where it might be ripped or edged. See PENCIL END TRIMMED.

pencil rot A type of decay found in Cedar.

pencil slat A thin slice of wood from which pencil parts are cut.

pencil square The bolt from which pencil slats are cut.

pencil stock Pieces of Eastern Red Cedar or Incense Cedar from which pencils are manufactured. Pencil stock consists of squares 8 inches in length, or in multiples of 8 inches, and equal to the thickness of the piece in width.

pencil trimming Invoicing less board footage than what actually is shipped.

pencil wane Light to no wane.

pendant An ornamental piece suspended from a ceiling or roof for decorative effect. Often used in Victorian architecture.

pendentive An arch that cuts off the corners of a square building internally, so that the superstructure may become an octagon or dome.

pendulum saw A swinging circular saw suspended as a pendulum, and usually used to cut logs to length as they enter the manufacturing plant.

penetrating oil finish Any of various wood finishes consisting of an oil and a solvent such as mineral spirits.

penetration A term referring to the relative resistance of woods to impregnation by preservatives. According to the structure of the wood, some are easily injected, but others are very resistant. Douglas Fir and some species of Spruce are difficult to treat, but long-leaf Pines are readily injected.

penny [d] This term originally described the price, per hundred, of nails. Now it is used as a measure of nail length. In general, the larger the number, the larger the nail.

penta See PENTACHLOROPHENOL.

pentachlorophenol A chemical used in wood preserving; it is usually applied under pressure so that it will penetrate the wood. Also PENTA.

pentavalent arsenic The form of arsenic used in the wood preservative chromated copper arsenate. This naturally occurring trace element is present in soil, water, and air, as well as in plant and animal tissue.

pent roof A roof with a slope on one side only.

per acre material [PAM] Dead timber and logging residue sometimes sold by the Forest Service or another land manager for its salvage value. Since values are usually too low to justify close measurement of the volume and type of material, it is priced per acre based on sampling a small plot.

per car charge See PER CAR RATE.
