PRICES ARE PUBLISHED AS A GUIDE ONLY to sales at the manufacturer level in carload or similar volumes during the week of publication. No attempt is made to predict future prices or trends. Specific sales, because of variations in stock quality and tallies, result in prices that are higher or lower than those published. The report is based on sizes and grades that conform to Product Standard 20-15 and on surfacing, grademarking and discounts that conform to general industry practices; on stock that originates in the principal producing region for each species; and on random-length loadings that contain a normal assortment of the lengths most desired in each size.

1-Prices delivered in Canadian funds, GST not included.

Canadian Panel Price Methodology: Many of the delivered Canadian OSB prices and all of the Spruce and Douglas Fir plywood prices on this page originated in the former Crow's newsletter. All delivered OSB prices in this section are derived from weekly market price assessments. The Spruce and Douglas Fir plywood prices are all derived from the Toronto 3/8-inch price. The 3/8-inch prices for other destinations are based on freight adders or deducts using Toronto as the base. In each destination column, the price for each thickness below the 3/8-inch price is derived from formulas using 3/8-inch as the basis. The 1-inch panel prices reflect additional costs at the manufacturing level.

PRICE GUIDE

International Item Codes

Item codes used to identify International prices for spreadsheet and database files.

[mbf/msf m³] Prices are in U.S. (\$) or Canadian (\$) currencies. Prices are gathered in board feet/square feet and converted to cubic meters. For conversion factors, see www.ripi.com. Go to In Depth > Useful Data > Conversion Factors, or call Random Lengths at 1-888-686-9925. **Prices are published as a guide only.** No attempt is made to predict future prices or trends. Specific sales may be higher or lower because of variations in stock quality, tallies, and other factors.
